SEED BUYERS ATTENTION!

Seedsman and Seed Catalogues are divided into several classes:

1st. A class whose catalogues are filled with over-drawn illustrations, and whose pages teem with fabulous tales, outside the bounds of all reason.

2nd. The "fancy priced man" with his extravagantly expensive catalogue, charging high prices for ordinary seed.

3rd. The so-called "cheap" seedsman, whose only argument is cheapness, and whose stock is generally dear at any price.

4th. The seedsman who aim to offer the BEST SEEDS possible to procure, and at a reasonable price. We are in this class, which is of good size. Everything we offer was grown for seed, carefully selected and cleaned. We do not, knowingly, misrepresent anything. Our descriptions are reliable; our illustrations modest and true; our prices reasonable. We ask your patronage.

Select Garden Seed.

ZIMMERMAN'S EARLIEST.

Earliest Cabbage in the World.

Well knowing the demand for a reliable extra early variety, spared neither time nor expense to secure the earliest variety possible and feel safe in saying I have here the EARLIEST VARIETY EVER OFFERED. Many seedsmen are claiming to have the earliest, but a trial will show MY Earliest to be many days ahead of anything on the market. It is not only the EARLIEST, but reliable in every way and can be depended upon to yield good size marketable heads of fine quality. Almost every plant forms a fine, solid head in a remarkably short space of time. It makes a close, compact plant, can be set close together and yield large crops. Don't fail to include a packet of THE EARLIEST in your order. You will be well pleased. Market gardeners will find this grand variety very profitable for extra early market. Pkt 5c, oz 25c, $\frac{1}{4}$ lb 65c, $\frac{1}{2}$ lb \$1.15 postpaid.

EARLY WINNIGSTADT—A good extra early variety and very popular. Forms large cone-shaped heads of fine quality in seasons when other early varieties fail to head at all. It suffers less from worms than most any variety. Pkt 5c, oz 15c, $\frac{1}{4}$ lb 45c, $\frac{1}{2}$ lb 80c, lb \$1.50 postpaid.

EARLY JERSEY WAKEFIELD—My stock of this old reliable variety is the best, being true Long Island crop of 1902. This is one of the best early cabbages in cultivation and is very popular and too well known to need any description; is always sure to form good marketable heads in 100 days or less. Remember I handle no old stock and guarantee seed as true stock, crop of 1902. Do not buy old and inferior seed. Pkt. 5c, oz 20c, $\frac{1}{4}$ lb 60c, $\frac{1}{2}$ lb \$1.00, lb \$1.90, postpaid.

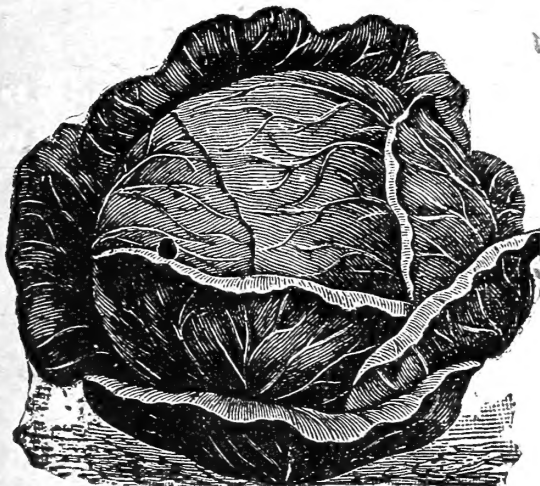

ZIMMERMAN'S EARLIEST.

All Head Early Cabbage

As can be seen from the engraving, this is a large, early, round-headed cabbage. For size, earliness, reliability of heading and quality it has no equal. It is the finest large summer cabbage on the market, being at least one-third larger than any other early summer cabbage. The heads are solid and so compact that nearly one thousand more can be grown per acre than any other cabbage. On account of its rapid growth, it is very tender and the flavor is unsurpassed. Pkt. 5c, oz 20c, $\frac{1}{4}$ lb 55c, $\frac{1}{2}$ lb \$1.00, lb \$1.90 postpaid.

EXTRA EARLY EXPRESS—With the exception of my EARLIEST, this is probably the earliest cabbage on the market. Is of close compact habit; has few loose leaves and is of fine quality. Pkt 5c, oz 18c, $\frac{1}{4}$ lb 50c, $\frac{1}{2}$ lb 90c, lb \$1.75 postpaid.

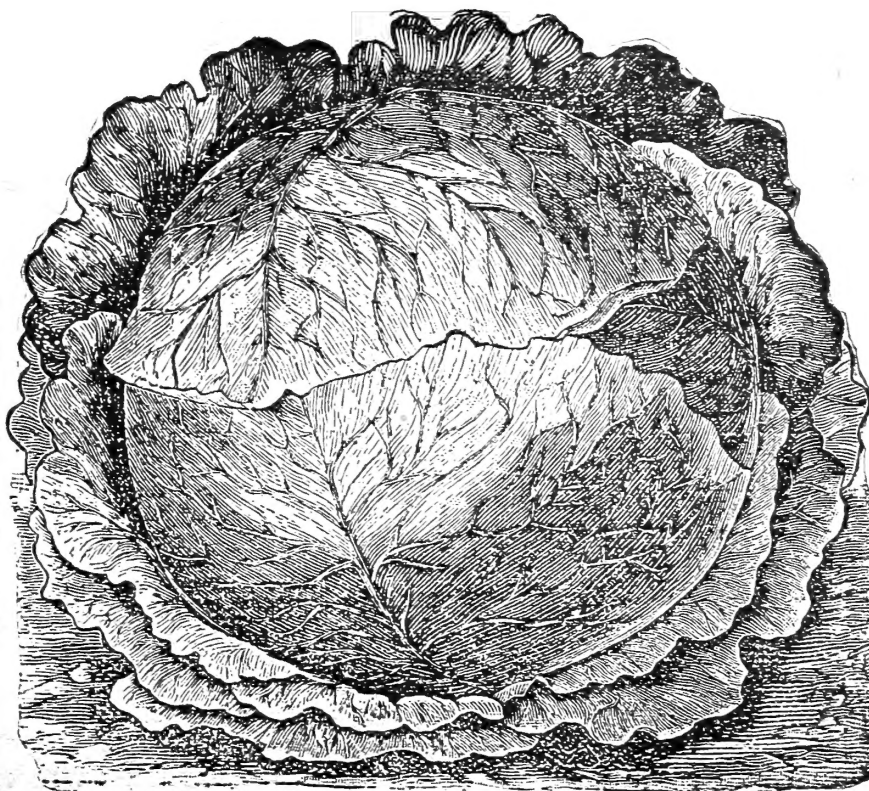

ALL HEAD EARLY.

ZIMMERMAN'S SUREHEAD.

All head and always sure to head. This is a large main crop variety of the Flat Dutch type. It is sure to form large round heads, extra hard firm and of superior quality and fine texture. You will not be disappointed in this Sureheading cabbage. It is also one of the largest cabbages grown, averaging about 25 pounds, but specimens have been grown to weigh over 50 lbs. It is a good keeper, excellent shipper; in fact it is hard to surpass this grand cabbage for home use, market gardeners or others. The Earliest of All.

We are pleased to offer our customers the Earliest variety of Sweet Corn in the world. This must not be compared to the "Earlies" offered by some seedsmen, which are so small and inferior that they are absolutely worthless, but here is a variety that will be of greatest value to all who desire the VERY EARLIEST variety and one that can be depended upon to yield a profitable crop. It is superior to the Early Cory in quality, tenderness and yield, while it is easily ten days earlier than any variety yet introduced. If you want the First Sweet Corn in the market plant this new variety. Pkt 6c; ½ pt 12c; pt 20c; qt 35c, postpaid. By express or freight not prepaid, qt 25c; 4 qts 75c; pk \$1.25.

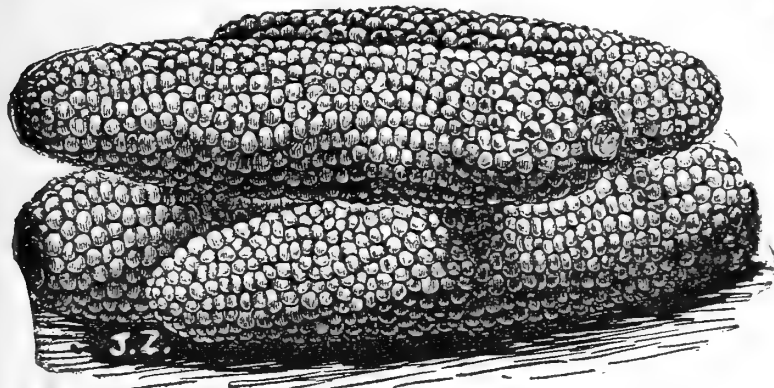

New Early Mammoth.

The Largest Eared Early Sweet Corn Ever Produced. Produces fine ears from 8 to 10 inches long and is ready for the market as early as the Earliest offered by the majority of seedsmen. This is a corn we want you to try this season. Our stock is limited, as this is the 2nd season this grand variety has ever been placed on the market, but we hope to supply all orders. Send in your order early, for you are sure to be pleased with this grand new corn. The pure white cob contains twelve rows of large grains of the finest quality. It will stand a dry season better than any early variety yet produced. It is the proper size for the market and of the sweetest flavor. You will find our EARLY MAMMOTH to be the finest and best Early variety you ever planted. Don't fail to include some of this Sweet Corn when you order. Pkt 6c; ½ pt 15c; pt 25c; qt 40c, postpaid. ZIMMERMAN'S EARLIEST.

BEST EARLY CUCUMBER.

The best early variety in the world. It stands without a rival in the early field and in fact cannot be excelled as a cucumber for general use. It is a very heavy yielder, producing cucumbers from five to eight inches long and from one and one-half to three inches in diameter in great abundance. The fruit is handsome, uniform in size and of a dark green color. The flesh is crisp, tender and of superior flavor. Not only fine for table use, it is excellent for pickling. If you want an all around cucumber, plant our Earliest. Pkt 5c; oz 20c; $\frac{1}{4}$ lb 50c; $\frac{1}{2}$ lb 80c; lb \$1.55.

IMPROVED LONG GREEN.

CHICAGO PICKLING—One of the best and most prolific pickling cucumbers on the market. The vines are vigorous and produce fine fruits in great abundance. By keeping the vines clear they will bear longer than most any variety in existence. Do not buy cheap Cucumber seed this year, as it will be old stock, the crop of 1902 was almost an entire failure. Good 1902 stock cannot be sold for less than our prices. Pkt 5c; oz 15c; $\frac{1}{4}$ lb 50c.; $\frac{1}{2}$ lb 85c.; lb \$1.55.

BOSTON PICKLING—Another fine pickling variety and claimed to be superior to the Chicago Pickling by many. It is certainly a good Cucumber. Pkt. 5c; oz 15c; $\frac{1}{4}$ lb 50c

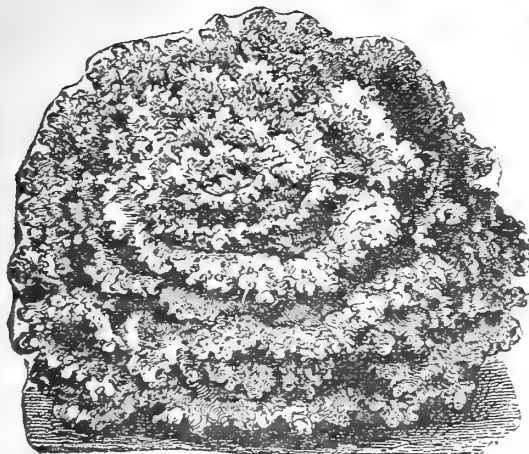

LETTUCE.

We are careful to list only the best varieties and our seed is fresh and of the finest quality. Zimmerman's seed can be depended upon, not only to grow but to produce crops of the highest quality.

Zimmerman's Earliest.

EARLIEST LETTUCE IN THE WORLD. CRISP AND TENDER.

(See Illustration in Colors on Back of Cover.)

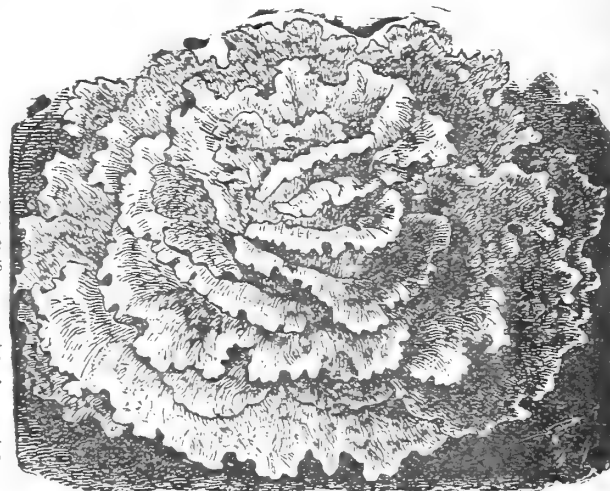

ZIMMERMAN'S EARLIEST.

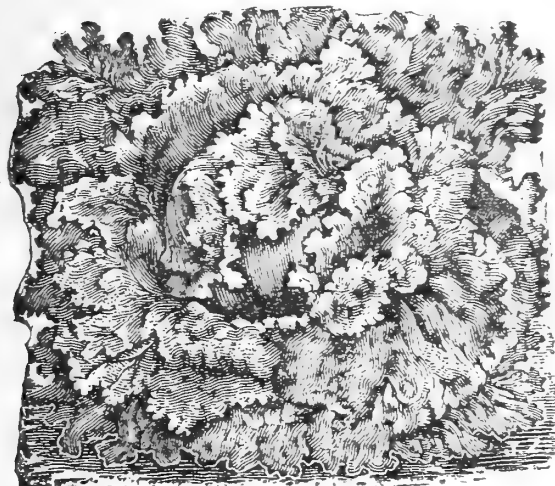

BLACK SEEDED SIMPSON—The most popular market grower's lettuce. Very early and forms a compact mass of loose leaves which are large, thin and very tender; far superior to the Early Curled. Is one of the best for forcing under glass as well as out-door planting. Remains in condition a long time before running to seed. Pkt., 5c; oz., 10c; ¼ lb., 25c, postpaid.

EARLY CURLED SIMPSON—The earliest of all lettuce. A large, loose-leaved variety. Leaves are beautifully crimped, tender and sweet; dark green in color. Pkt., 5c; oz., 10c; ¼ lb., 25c, postpaid.

THE NEW MORSE—Claimed to be even a better variety than the Black Seeded Simpson. Is of the Simpson family and resembles the Grand Rapids. Pkt., 5c; oz., 15c; ¼ lb., 35c, postpaid.

BLACK SEEDED SIMPSON.

IMPROVED HANSON.

IMPROVED HANSON—A very large, sweet, tender and crisp variety; forms large solid heads averaging some three pounds in weight. Heads are green outside and white within. Is absolutely free from any bitterness. Unexcelled for family, garden and out-door growth. Pkt., 5c; oz., 10c; ¼ lb., 25c, postpaid.

CALIFORNIA CREAM BUTTER—One of the best of the Butter-Head varieties. The outer leaves are marked with small brown spots; center is a beautiful cream yellow. They are crisp, tender, have a rich buttery flavor and are very ornamental. The heads are of good size and so very solid they often have to be cut before the seed stalk can appear. Pkt. 5c, oz 10c, ¼ lb 25c., postpaid.

GRAND RAPIDS—This is a loose-leaved variety of strong growth. Requires less attention than the Black Seeded Simpson, and will stand longer after maturity, thus making a good seller. Is of upright habit and handsome appearance; leaves thin, light yellowish green, beautifully crimped and blistered. Pkt., 5c; oz., 10c; ¼ lb., 25c, postpaid.

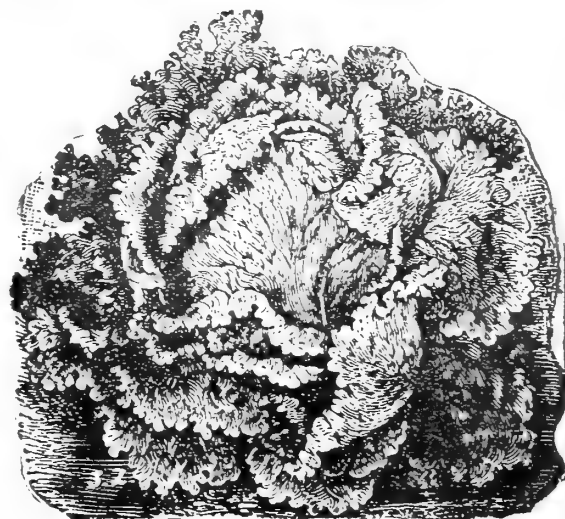

HARD HEAD—A ready grower; heads hard and firm. Pkt., 5c; oz., 10c; ¼ lb., 25c, postpaid.

ICEBERG—This new variety cannot be surpassed. It forms a solid head of great beauty; the outside leaves are bright green and beautifully curled. The leaves are always crisp and tender either in early spring or hottest summer. The solidity of the head is insured by the white main ribs curving strongly to the center, which is always thoroughly blanched. There is no more superior lettuce to be had. My stock is the very best, being carefully selected crop of 1902. Pkt., 5c; oz., 10c; ¼ lb., 30c, postpaid.

EARLY PRIZE HEAD—Produces large loose heads of beautifully crimped and fringed leaves, exceedingly sweet, crisp and tender. A fine home garden lettuce of the loose variety. Pkt., 5c; oz., 10c; ¼ lb., 25c, postpaid.

Please remember we offer **ONLY** the varieties that will give the best satisfaction. When confused by the long list of **DOUBTFUL** varieties, offered by some seedsmen, just turn to **OUR** Catalogue; we have **THE BEST** and **ONLY THE BEST**.

We purchased the stock at once and decided to call it the Home Favorite. However, it has no superior as a market as well as home variety. LARGE WHITE MARROWFAT—Cultivated quite extensively for canning. The vines are about 5 feet high and of strong growth. Pods are large and well-filled with smooth, round and yellow or white peas, according to the soil in which they are grown. Are excellent for summer use, but inferior in quality to most of the newer sorts, although one of the heaviest yielding varieties. Large pkt 5c., ½ pt 15c., pt 25c., qt 40c postpaid. By express or freight not prepaid, qt 20c., 4 qts 60c., pk \$1.10.

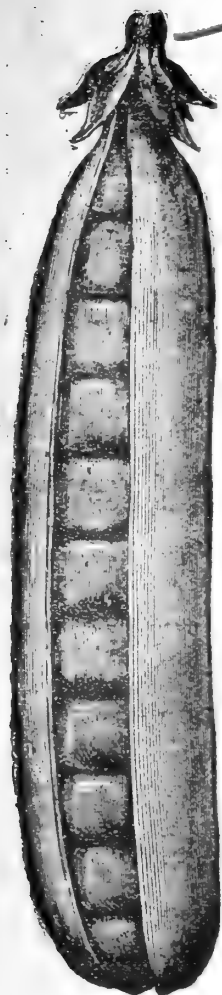

TWO WEEKS EARLY.

This is not only the Earliest Pea in cultivation, but is unequalled for yield and regularity of growth. They bear a heavy crop of well filled pods from three to three and one-half inches in length, nearly all of which can be gathered at one picking. Vines grow 18 inches in height and are loaded with these early delicious peas. Their flavor is the best and they are by far the earliest and finest early pea on the market. This pea more than fulfilled all our claims for it last season. The heavy rains and long wet spell in the Western states caused many varieties to rot and blight. In fact, we know of many gardeners who pulled up their vines as worthless, but our Two Weeks Early, because of its extreme earliness and vigor, came through with its crop of delicious peas. WE HAVE NO REPORT OF A FAILURE. Wherever planted, they have always been THE FIRST. They are not an everbearing pea, but produce a large crop, maturing uniformly and the space can easily be used for some other vegetable, before other peas are near maturing. Pkt., 8c; ½ pt., 15c; pt., 25c; qt., 40c, postpaid. By express or freight not prepaid, qt., 25c; 4 qts., 85c; pk., \$1.50.

LITTLE GEM—(Improved Strain.) A great improvement over the old Little Gem. A second early of fine flavor. Large pkt., 8c; ½ pt., 15c; pt., 25c; qt., 40c, postpaid. By express or freight not prepaid, qt., 25c; 4 qts., 90c; pk., \$1.75.

Its tall, healthy vines are simply loaded with their giant pods, filled with giant peas of the most delicious flavor. It is certainly the largest and heaviest yielder. EARLY WONDER.

Earliest in the World.

This variety is truly an Early Wonder. It is without a rival in the early field. Produces its beautiful, luscious fruit long before tomatoes are even thought of. This is not to be compared with the so-called earlies offered by many seedsmen, but we guarantee it to be not only the Earliest but the BEST OF THE EARLIES. It is of good size, perfectly smooth, round and of a beautiful rich red color. Its earliness, smoothness, superior quality and handsome appearance makes it the grandest Tomato ever introduced. By all means plant this grand Tomato this year; you will be more than pleased with it. Market gardeners can reap a rich harvest by getting the early fancy prices for the first tomatoes. ZIMMERMAN'S GOLD DUST TOMATO.

The Largest, Perfectly Smooth Tomato in the World.

This is a novelty. The vines are very robust, in fact they very closely resemble weeds, until almost grown. And their beauty! Go into your garden mornings and you will find them sparkling and GLISTENING IN THE SUN LIKE GOLD apparently covered with gold dust, hence the name, GOLD DUST. But the beauty and robust nature of the vines is not their strongest point. They are a purplish-red color, medium early, large size and AS SMOOTH AS AN APPLE. A trial will prove our claim that they are the LARGEST PERFECTLY SMOOTH TOMATO IN THE WORLD. Order early. Pkt 10c.; 2 pkts 15c.; ½ oz 30c.; oz 50c.; ¼ lb \$1.40 postpaid.

Northern Potatoes.

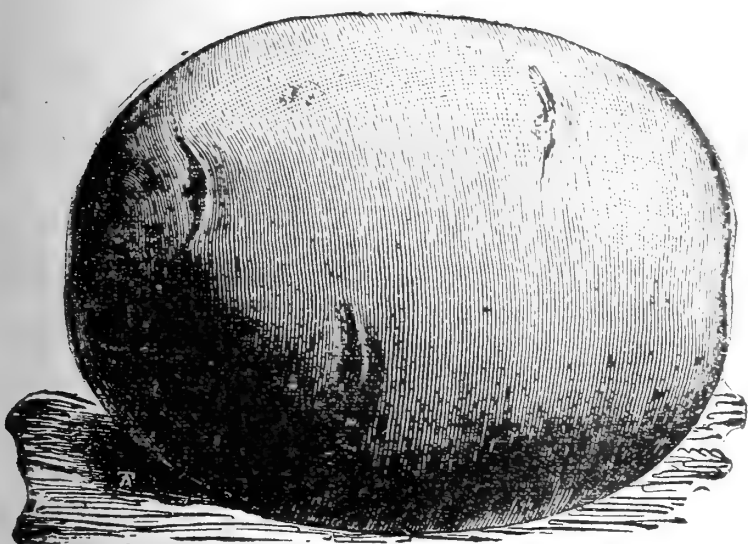

Choice Seed Potatoes are scarce and high this year. Our stock is of the finest and hardiest quality and will give our customers the perfect satisfaction as last season.

THE EARLY DELIGHT POTATO.

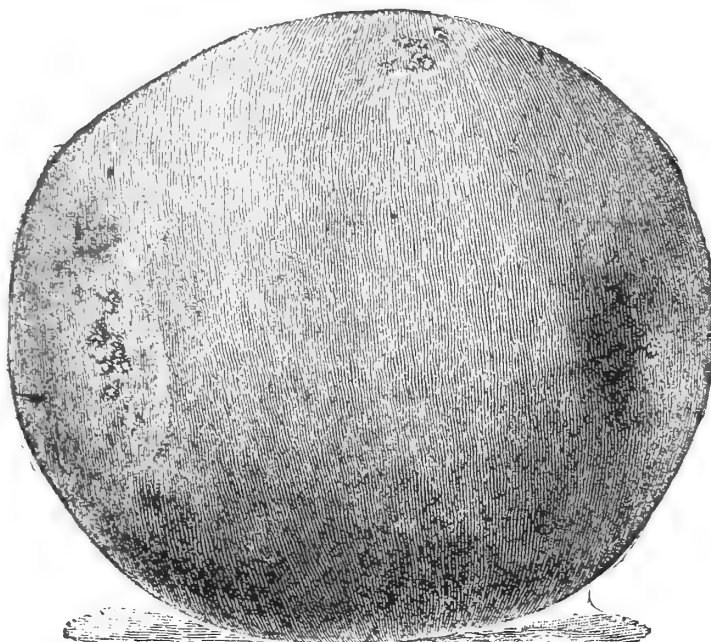

We offered \$25.00 for the largest yield from one pound of seed potatoes last season, which was won by Mr James Buchanan of Rootville, Pa., his yield, as certified to by two witnesses, was 83½ lbs from one pound, which figures up to about 700 bushels per acre. Several others got above the 80 lb mark. This is certainly a grand early potato and one which is sure to please all who plant it. It is of the Pose family; as early as the Early Rose and is a tremendous yielder. Try it this year. Lb 30c.; 3 lbs 70c, by mail postpaid. By express or freight, pk 75c.; ½ bu \$1.25; bu \$2.40.

Select Field Corn.

Much inferior corn is being sold over the country, which has been as cheaply and carelessly grown as ordinary market corn, and is shelled and sold, nubbins, rotten ears, tip kernels and all. We are not in that class. Ours was planted, cultivated and harvested with the view of obtaining the greatest vitality and germinating properties and is fully developed, sound and dry; is carefully selected, **HAND SHELLED, and ALL NUBBINS, TIP KERNELS, Etc, ARE CAST OUT.** When you purchase a bushel of corn from us, you get **A BUSHEL OF STRONG, SOUND CORN.**

COMBINATION.

AWARDED PRIZE KANSAS STATE FAIR, 1903.

**The Hardest, Largest Grained, Heaviest Yielding
Field Corn Ever Introduced.**

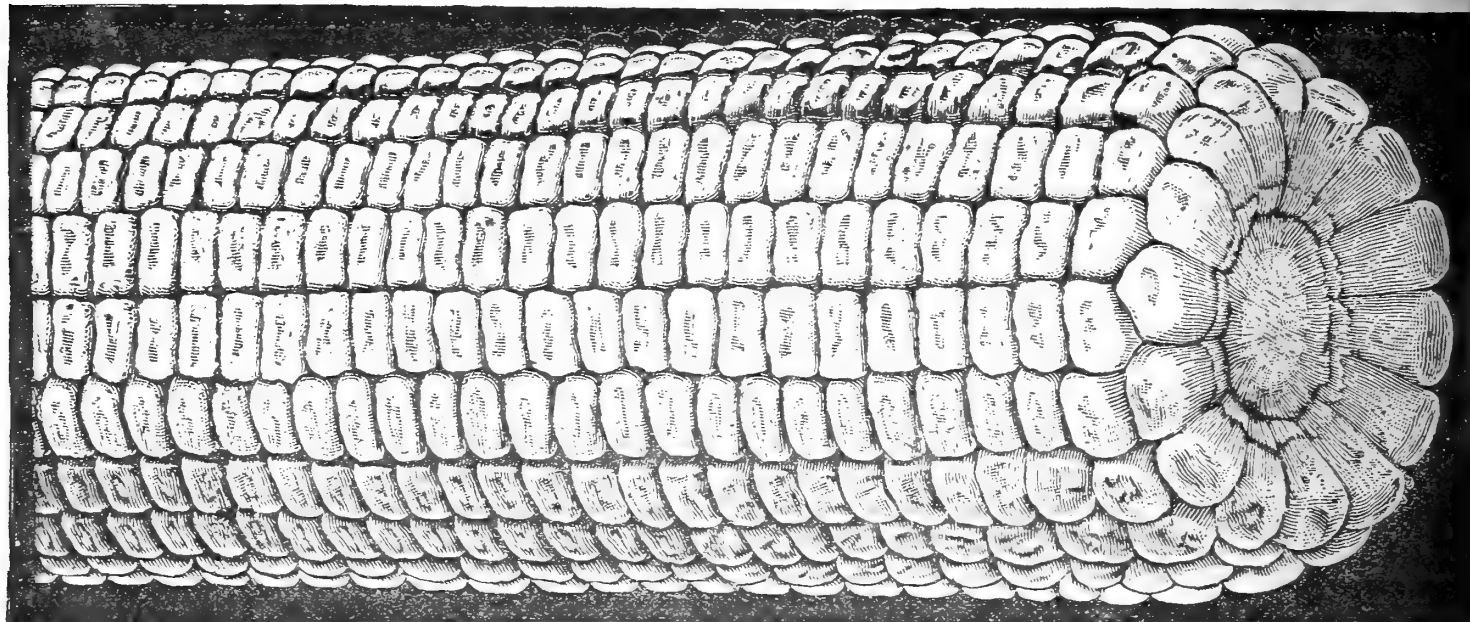

"COMBINATION" FROM A PHOTOGRAPH.

We have here a corn, combining more good qualities than any corn we ever heard of. It is the best corn for feeding purposes and in undeniably the most reliable and hardest corn on the market. You will be astonished at its yield, its great weight and its deep, broad fine grains. We have spared neither time nor expense to fully develop this grand variety and are much gratified with the result. The main color of the corn is a rich ox-blood, surmounted by yellow in such a manner as to give the appearance of a yellow corn on a red background, blending into a beautiful combination; in fact its beauty and originality is so striking that it immediately draws attention. No picture; no illustration, can do it justice. The grains are large and deep, easily shelled and wonderfully nutritious, making it the finest and most valuable corn, for feeding purposes, on the market. Hogs, horses and stock of all kinds will certainly thrive upon it. Now, remember, we try to never mis-represent anything, we don't tell fairy stories of fabulous yields and "wonderful" discoveries, etc, so a word as to our stock and where it came from: Our "Combination" first came to our notice as an ordinary red corn with the faintest touch of yellow; It was planted and cultivated according to our directions; was exhibited at the Kansas State Fair, at which there were scores of varieties and hundreds of corn exhibits, and our "Combination" stood alone; **NOTHING LIKE IT, NOTHING TO BE COMPARED WITH IT.** The color may vary slightly from a reddish yellow to a rich dark red, and while we do not guarantee two ears to the stalk (as it was with us) you will undoubtedly find it to be a tremendous yielder.

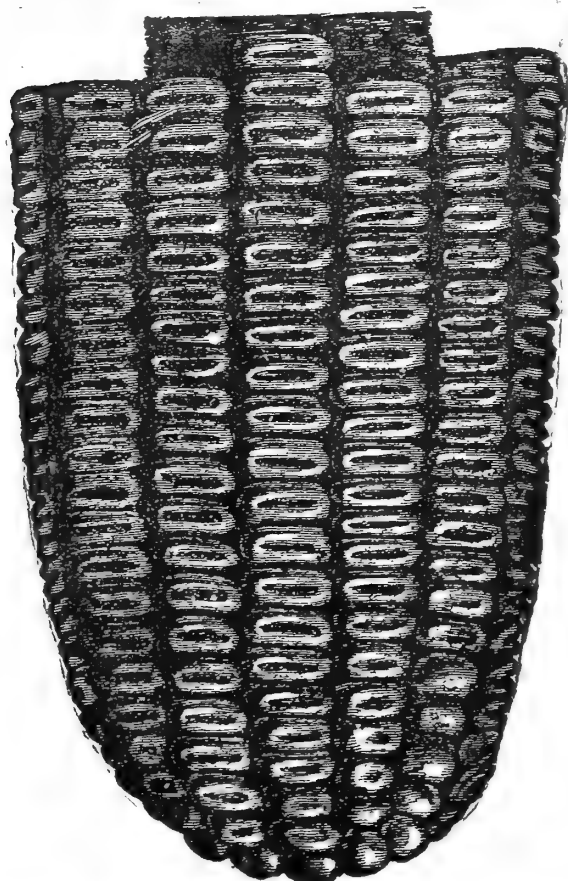

Now listen! We claim the seed we offer of this variety to be

carefully selected and hand sorted, large, fine grains, free from tip kernels, etc. If you don't find it as fine looking seed corn as you ever received in your life; read our description carefully and if it is not just as we describe it, **SEND IT BACK AND GET YOUR MONEY.** That's the way we do business. Pkt 6c.; pt 20c.; qt 35c. By express or freight, not prepaid, qt 12c.; pk 60c.; $\frac{1}{2}$ bu \$1.10; bu \$2.00.

MONEY-MAKER. A Pure White.

We have here a corn which stands at the head of white varieties. Is earlier than the White Pearl and has out-yielded Silver Mine side by side. 75 pounds of ears shelles 70 lbs of corn. Matures in 95 days, the ears running 11 and 12 inches in length; cob small and containing 16 to 20 rows of deep, pure white kernels. No! we dont claim it will yield you 250 bushels per acre, but planted side by side has and will out-yield varieties claimed to have such fabulous yields. We claim it to be the HANDSOMEST, HARDIEST, DENSEST, WHITEST, most UNIFORMED kerneled SUREST MATURING and BEST white corn we have ever seen, and our Mr. Wilson spends his entire time personally investigating these things. We want you to see this variety. Give it a trial for a white corn. Plant our seed and you will have the best of all. Our seed gives satisfaction in every state and territory in the U. S., Alaska, Hawaii Islands, Phillipines, West Indies, South America, Canada and parts of the Old World too numerous to mention. The reason is we have but one quality--THE BEST. Try our pure white Money Maker corn. Pkt. 6c.; $\frac{1}{2}$ pt 12c.; pt 20c.; qt 35c, postpaid. By express or freight not prepaid, qt 12c.; pk 60c.; $\frac{1}{2}$ bu \$1.00; bu \$1.90.

New GOLDEN ECLIPSE.

This corn has fully lived up to all our claims for it. On the preceding page we tell of the merits of our "Combination" and mean every word, but some farmers prefer a yellow corn, so we offer here our New Golden Eclipse as the best yellow variety. What ever has been said of any other yellow corn, can be said of this one, AND MORE. It is early, a heavy yielder, deep kerneled, small cob, very hardy. It is the largest grained and handsomest yellow corn we have ever seen. The cobs are small and filled to the very tip with bright golden-yellow grains. Its rich color and fine quality makes it a superior corn for grinding into meal as well as feeding purposes. It costs less to purchase seed corn than any other grain, and when you get a stock of our New Golden Eclipse, you have something of value. A corn that cannot be eclipsed. No use to say more, if you want the finest and best, we have it. Pkt 6c.; $\frac{1}{2}$ pt 12c.; pt 20c.; qt 35c, postpaid. By express or freight not prepaid, qt 12c.; pk 60c.; $\frac{1}{2}$ bu \$1.00; bu \$1.90.

You will find ALL our Seed Corn of superior quality. It is Hand Sorted, Hand Shelled. No Nubbins, No Tip Kernels. Every Grain a Good One.

Thousand Headed Kale.

Thousand Headed Kale originated in northern Europe, and is becoming very popular in this country. Many shrewd farmers claim it is even superior to Essex Rape as a pasturage. It may be called a variety of cabbage that produces enormously. It does not head, but produces a tremendous mass of beautifully curled, long, large leaves of a rich green color, which are eagerly eaten by sheep and cattle. It grows to a height of 3 or 4 feet and produces an almost endless number of sprouts or shoots, upon which the leaves of great richness are grown. You will find this one of the most profitable forage crops grown. Try an acre or so of our hardy seed; our word for it, you will be pleased. If sowed in drills, one pound will plant an acre; if scattered broadcast, 1½ pounds per acre. If in drills, drop seed 8 inches apart in rows 12 inches apart. in dry arid soils. It is a hardy grower; a great drouth resister. It has been very clearly demonstrated that it will succeed in a wider range of temperature than any other grass. Land too poor to raise the common agricultural grasses and crops, will give splendid yields of Bromus Inermis. In making permanent pastures, it should be sown with other grasses. It may be sown with winter wheat or in the Southern states in Feb or March. In the North, it should be sown later. Sow 20 to 30 lbs per acre. Lb 30c.; 3 lbs 80c., postpaid. ALFALFA or LUCERNE.

Alfalfa is particularly adapted to our Western soil and climate. It is also winning popularity in other sections and praise comes wherever it is planted. It does best in a sandy loam. In dry, hot, sultry weather, when other forage and grass is parched and withered, Alfalfa is fresh and green, the roots going down 15 to 20 feet. It rather improves the soil, although a heavy yielder. In Kansas and like climates, sow not later than Sept. In irrigated localities, it can be sown any time during the summer. The best rule, however, is to sow as early in the spring as weather will permit, using not less than 25 lbs per acre, for feeding, or 12 lbs if for seed. If never planted in your locality, TRY IT. We will send full directions for its cultivation, with every order, if asked for. There are many grades of Alfalfa seed on the market, dont buy poor seed. Sow 14 lbs to the acre, for pasture, or 60 lbs per acre for lawn. Genuine Blue Grass Seed, large pkt 6c; 1b 35c; 3 lbs \$1.00 postpaid. Pkt 10c.; 1b 30c.; 3 lbs 80c, postpaid. By express or freight, 5 lbs \$1.00; 10 lbs \$1.85; 25 lbs \$4.25; 100 lbs \$16.00.

RUSSIAN SPELTZ or EMMER.

A Great Drouth Resister. Does Well in any Climate or Soil, whether poor, or Stony. Succeeds Well on the Prairies. Not Damaged by rains. Out-yields Oats, Wheat or Barley, and Makes Better Feed. Makes Excellent Flour. The Straw Fattens Stock and the Stubble Fertilizes the Ground.

The United States Agricultural Department says: "The extreme variable climatic conditions in some of our Western states have made it desirable to give particular attention to crops resistant to cold and drouth. Among such crops, Emmer holds high rank and should become one of the most prominent crops for stock feeding."

We heartily recommend Speltz for planting in any part of the United States. It will grow anywhere. It makes a good pasture in its green state. When matured can be threshed like wheat, only not quite so close. The hull and kernel can then be fed or ground. Horses, cows, sheep, hogs, poultry, and in fact, all kinds of stock flourish upon it. Prepare land as you would for wheat or oats and sow at the rate of about 60 lbs to the acre.

OUR SPELTZ SEED IS GROWN AND SHIPPED TO US FROM MINNESOTA AND IS THE HARDEST AND BEST. Price of our select hardy stock: Lb 25c.; 3 lbs 60c postpaid. By express or freight, 10 lbs 40c.; 20 lbs ($\frac{1}{2}$ bu) 75c.; 40 lbs (bu) \$1.25; 50 to 100 lbs at 3 cts per lb; over 100 lbs at $2\frac{3}{4}$ cts per lb.

RUST PROOF OATS. We have here a variety of oat, which, we firmly believe, will surpass anything in the Oat field. We might fill a page telling of their merits, telling wonderful tales of "marvelous" yields, but our customers depend upon us for the plain facts and we give them: We believe this to be **THE BEST OAT ON THE MARKET.** It is very early, rustproof, stands up well, has thin hull and heavy meat and is the most productive and **HEAVIEST YIELDER** we know of. If you are looking for a good oat, this will please you. Sow two bushels to the acre. Lb 15c.; 3 lbs 40c postpaid. By express or freight, pk 40c.; $\frac{1}{2}$ bu 70c.; bu \$1.20; 3 to 5 bu at \$1.10 per bu; over 5 bushels at \$1.00 per bu.

AMERICAN GINSENG.

An Acre Worth \$50,000.

Nothing in the agricultural world offers such inducements as does this wonderful plant. At this time, the market price for cultivated roots ranges from \$8.00 to \$12.00 per lb and the price is continually increasing, caused by the fact that the wild stock is practically exhausted. It is now being cultivated with great success. Many acres are under cultivation in New York, Kentucky and Central states, while Missouri is claimed to lead. We received several hundred letters, last year, inquiring for seed and plants. We are now in a position to furnish the very choicest stock at a low price.

Ginseng is imported to China, where the demand is twenty times greater than the supply. We give the reports of three U. S. Consuls:

U. S. Consul, James W. Ragsdale of Tienstin, China, writes: "American Ginseng is becoming more widely known and more popular every year. In the last few years, the prices paid for it have more than doubled. Almost everybody takes it in the spring as a tonic."

In a report to the State Department, Consul Johnson, stationed at Amoy China, said: "I do not exaggerate when I say that \$20,000,000 worth of these roots (Ginseng) could be marketed annually in China. * * It sells in Amoy at a price from \$25 to \$35 (Mexican) per pound."

Consul-General Rouseville Wildman at Hongkong, China gave the following report to the State Department, Jan 7, 1900: "I am in receipt by every mail, of letters from all parts of the U. S. asking for market quotations on Ginseng. American Ginseng embraces values all the way from \$9 to \$30 a pound, while the dust will not bring over \$2 a pound. There will be little difficulty in disposing on this coast all the Ginseng grown in America."

Start a small bed, it will multiply rapidly and bring a grand income, while an acre is a fortune. Our seed is water tested, and in good condition; full directions for cultivation and complete information on Ginseng sent with each order. We pay the express and mail charges; 50 seed \$1.50; 100 seed \$2.00; 250 seed \$4.00; 500 seed \$7.50; 1,000 seed \$12.00, Yearling roots 10c each.

Choice Flower Seed.

Our List Contains Those Varieties Easily

A Lady Has Full Charge of This Department.

The same HIGH STANDARD of quality, which characterizes our garden and field seeds, is maintained in our flowers. Our seed is fresh, much of it imported and ALL of high germination.
